

Dear Sir/Madam,

It's been great to not having telemarketers call my residence and I would like this to remain that way. The public needs to have the choice of not having to be bothered by people calling their homes. The phone is for convenience and not harassment. I would appreciate it that we do not get harassed by telemarketers. The phone is supposed to be used to talk to friends and family and I would like it to be that way.

Thanks
Satyen
